InVision™ GRX/S8

Turn Data into Action

iBASIS' InVision™ for GRX/S8 enables mobile operators to enhance their subscriber's data roaming experience and increase their competitive power by turning near real-time data into actionable information.

MONETIZING INTERNATIONAL DATA ROAMING SERVICES

InVision GRX/S8 is a powerful tool that enables quality monitoring, subscriber-level troubleshooting, intelligent proactive alarming, and reporting. It enhances performance by identifying and solving issues (often before the end-user even notices a problem) and providing full visibility and control over your data traffic. These advanced capabilities give insight into key service quality parameters and alarm for core services such as signaling and data. InVision also identifies silent roamers, subscriber-provisioning errors, handset types and more, to support more effective commercial offers, corrective measures, and trends analysis for a better monetization of the data service.

These robust capabilities are easy to use. InVision's highly intuitive dashboard accommodates multiple users and user-defined profiles to support them focus in on their specific daily priorities.

InVision GRX/S8 SERVICE SNAPSHOT:

- Provides real-time visibility of international traffic
- Enables quick troubleshooting down to trace level
- Intelligent alarming enabling prioritization of issues
- Provides insight into otherwise unseen commercial opportunities
- Reveals traffic trends for more efficient capacity management

KEY BENEFITS

Leads to superior monetization of data roaming services

Supports increase of inbound and outbound roaming

Enhances the subscriber roaming service experience

Reduces operational costs through focused and proactive alarming, enabling fast resolution of issues and real-time access to CDRs

A web-based solution—no hardware or internal deployment required
